

135-A Wall Mount for HP Z2 Mini

SKU: 104-8599

The RackSolutions 135-A Wall Mount for HP is designed to maximize space and efficiently mount your Z2 Mini workstation directly to a wall, behind a monitor, or desk. This HP wall mount provides a vertical, low-profile installation that keeps your workstation off surfaces, improves airflow for cooling, and prevents accidental disconnection or theft (with the lock upgrade).

The Universal Monitor Wall Mount Arm must be paired with the Dual VESA Adapter for installation. For setups with an existing monitor mount or stand, only the Dual VESA Adapter is needed for customization.

Please note that desk installation requires additional considerations. We do not provide mounting hardware for desk configurations. Customers are responsible for purchasing the desk mounting hardware separately and must determine if the 135-A Wall Mount for HP is compatible with their desk.

- Compatible with HP Z2 Mini G9 and HP Z2 Mini G1i
- Clears desk space and keeps HP Z2 Mini desktop accessible for users
- Cables are organized, secured, and neatly routed along the wall or desk
- Optional locking mechanism enhances security, reducing the risk of tampering or theft
- IT professionals can easily locate and access devices during support or upgrades
