

1U Sliding Shelf Rail Kit for Dell Pro Max Tower T2 Desktop

SKU: 112-8178

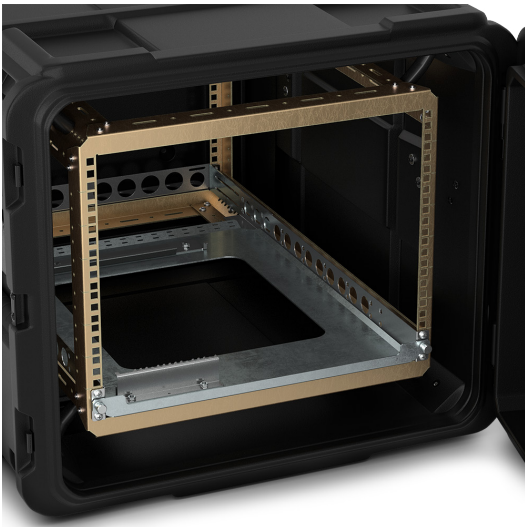

The RackSolutions 1U Sliding Shelf Rail Kit is specifically designed for the Dell Pro Max Tower T2 Desktop. This rail kit mounts in any EIA-30, 19" 4 post server rack with square, round, or threaded holes. The Dell Pro Max Tower T2 Desktop is secured to the rack shelf with a front and rear bracket, allowing the shelf to dry slide on top of the metal flanges found on both sides of the mounting rails. With this sliding shelf rail kit, it prevents equipment from moving or falling during transit, reducing the risk of damages or accidents.

Additionally, it features a mounting depth of 10 - 31.50" (254 - 800mm) and includes a cabling crossbar that is optional for installation. The thumbscrews are used to secure the shelf to the front of the rack. For square hole racks, cage nuts are required for installation.
