

Modular Rack Shelf for Device Test Labs

When developing apps, software, and websites to work across a wide array of electronic devices, it's important to test on real devices. Modular Rack Shelves are ideal solutions for a small in-house mobile test lab setup or an enterprise device farm for cloud-based mobile app testing.

Our Modular Shelves maximize space and improve organization of test labs by deploying hardware in a server rack, rather than using temporary improvised solutions. Utilizing these dynamic shelves, rather than laying your devices around, makes more efficient use of space. This allows you to house multiple devices on a single shelf with flexible options based on your needs, increasing density and scalability.

P/N	Description
115-6933	1U Modular Device Testing Sliding Rack Shelf 28in
115-8798	1U Tool-less Modular Device Testing Sliding Rack Shelf 29in Depth with CMA
