# 5U HyperShelf for 7 Lenovo ThinkStation P3 Ultras
SKU: 115-8939

Cable Routing Guide

- (1) Obrounds located on the power supply shelf are used for cable management with Velcro ties.
- (2) Lances located at the bottom of the HyperShelf are used for securing and routing cables.
- (3) Right angle power cord connectors are required to maintain proper bend radius when mounting PSUs.
- (4) Obrounds located on the mounting flanges are used for power supply units with Velcro ties.
- Cables slots are used to route the cables.

- The colored power supply example is our recommendation on how your cables should be routed.
- We recommend placing the 7th unit power supply behind the 5th unit power supply.

Unit 1	Unit 2	Unit 3	Unit 4	Unit 5	Unit 6	Unit 7

- (5) Lances are used for Velcro tie downs to organize power cables.

5
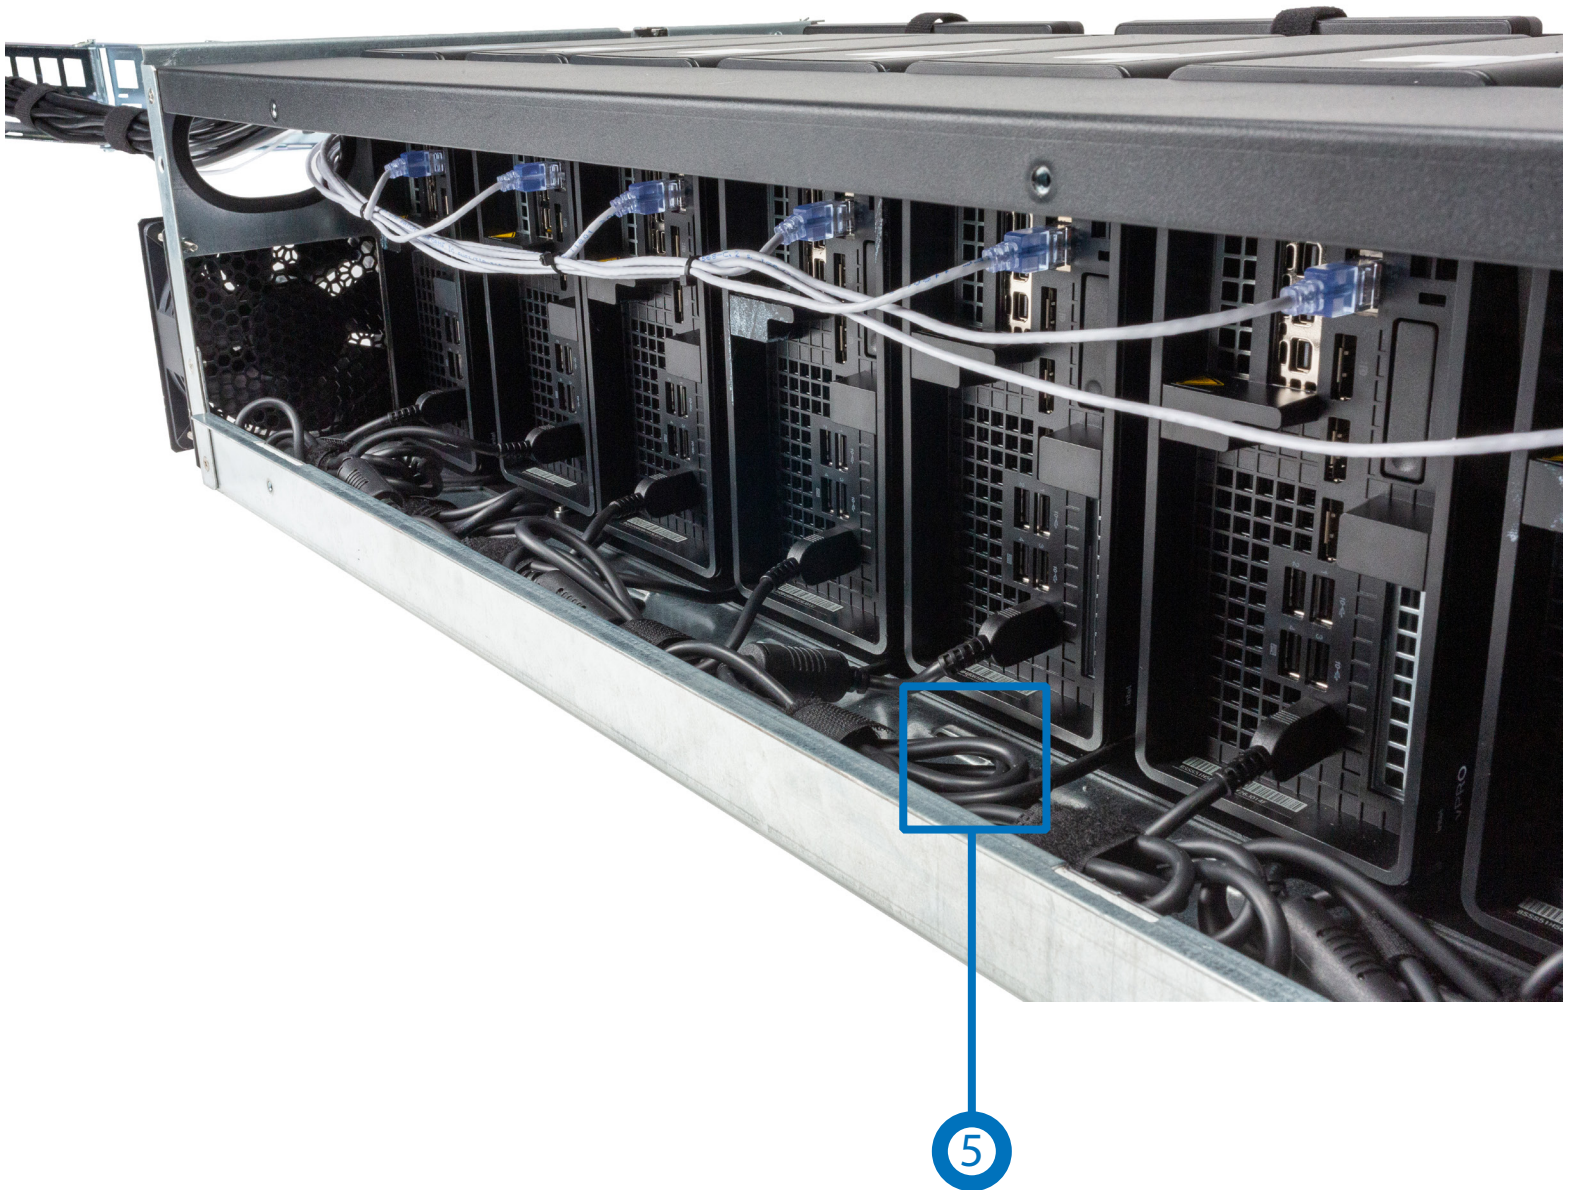

- (6) Obrounds located on the back of the HyperShelf are used for ethernet cables and the fan power cord.
