

HP DL380 Gen 8, Gen 9 & Gen 10, DL560 Gen 8 & Gen 10 Rack Rails

122-2447

This slide rail kit allows the HP DL380 Gen 8 to be installed in any type of server rack. Works with DL380, Gen 8. These rails replace the HP rail kit that would normally come with the sever. This DL380 Gen 8, Gen 9 & Gen 10 rail kit allows the server to be installed in typical 4Post server racks as well as 2Post server racks. These rails are considered a dry slide type. They allow the server to slide in and out, but they are not ball bearing slides. Also, the rails do not include a stop catch mechanism that prevents the server from sliding completely out of the rack when removing it for servicing.

- Non-ball bearing, slide rails
- Square, round, threaded hole compatible
- Adjustable mounting depth
- HP rail kit not required
- Mounting Depth Range: 3.0"-32.0"
- Mounts DL380 Gen 8 & Gen 9 in 4Post racks
- Mounts DL380 Gen 8 & Gen 9 in any 2Post Relay Rack
- Center mounts in 2 Post rack
- Works with 3" - 6" uprights
