

Adjustable Four Post Rack

Application

The Adjustable Four Post Rack is designed to rackmount servers and is adjustable to smaller dimensions for AV equipment. It is made with heavy duty steel which allows it to include universal square hole uprights including a maximum static load capacity of 1000 lbs, and has leveling feet to fit various needs. This open frame rack includes cable management D-Ring hooks that help organization and wiring. Its open frame creates fast accessibility and assembly, also allowing beneficial ventilation. It's constructed to store AV equipment, desktops, KVM hardware devices, and various servers. The Adjustable Four Post Rack is also designed to be compatible with PDUs and other devices.

Features:

- 20"- 40" deep
- 23.6" (600mm) wide
- 1000 lb (453 kgs) static load capacity
- Universal square hole uprights
- UPS Unassembled
- Assembly hardware is included
