

5U Low Profile Wall Mount Cabinet, 23"

Application

The 23 inch deep 5U Low Profile Wall Mount Cabinet is an excellent way to store and secure server and AV rackmount equipment. The low profile wall mount stores up to 5U equipment vertically to any wall. Equipment is easily accessible with a front door with a latch as well as a hinged top which allows easy access to knobs and switches on equipment. Both doors feature a lock with a key, ensuring all of your equipment is secure. The rack also features knockout holes for routing cables, and a vented bottom, which also allows mounting for 120 mm fans. It's low profile extends no more than 10 inches from the wall. This Wall Mount Cabinet features a maximum equipment depth of 30 inches and a maximum load capacity of 150 lbs.
