

TechEdge 2 Post Rack

A Different Type of 2 Post Rack

Our rack is constructed from 13 gauge steel, NOT aluminum, and features square mounting holes on the frame. Equipped with tool less button-mounting holes along the sides, vertical PDUs and cable managers can be easily installed. If you're looking for a more permanent solution, the rack comes with a floor anchor kit to secure your rack to a certain area. The TechEdge 2 post rack is available in 25U and 45U with both racks having a load capacity of 1000 lbs and all assembly hardware included.

- Universal square mounting holes
- 1000lb load capacity
- Constructed from sturdy 13 GA steel
- Tool less Button-Mounting Holes
- Assembly hardware included
- Self squaring design
